AI FINANCIAL CORPORATION

CORPORATE OVERVIEW

# The infrastructure behind agentic finance.

Connect business knowledge, AI agents and financial services. Keep identity, permissions and accountability clear.

Knowledge.
Intelligence.
Economic action.

AI Financial Corporation / Nasdaq: AIFC
Company and product explainer / October 2026

01 / THE BUSINESS NEED

# Make intelligence useful. Make action accountable.

A business workflow needs relevant context, an assigned task and a defined authority for the next action.

01

## Knowledge

Organize approved documents, expertise and media for the people and applications that need them.

02

## Intelligence

Connect models, compute and accountable agents around a specific business objective.

03

## Financial operations

Carry reviewed instructions into eligible services and preserve the returned operating record.

Start with one useful task. Add the capabilities, providers and controls that task requires.

02 / THE PRODUCT FAMILY

# Four offerings. Distinct business jobs.

01

## AiFi Vault

A defined knowledge collection, access model and application workflow built around your organization’s information.

**Explore AiFi Vault**

02

## AiFi Hybrid

A clearly scoped route from an authorized business instruction to provider confirmation and reconciliation.

**Explore AiFi Hybrid**

03

## AiFi Banking

A coordinated client and institution journey, with defined financial providers, review controls and reconciliation responsibilities.

**Explore AiFi Banking**

04

## AiFi Compute

A scoped workload and capacity plan, with defined data access, usage terms and application responsibilities.

**Explore AiFi Compute**

03 / THE FOUNDATION

# Six systems. Clear responsibilities.

AiFi brings the offering together. Independent ecosystem participants retain their own operating responsibilities.

AIFI OFFERINGS

## Vault / Hybrid / Banking / Compute

### Hybrid ID

Identity & permissions

### Hybrid Cortex

Agents & interaction

### Hybrid Banking

Financial operations

### Hybrid Chain

Shared infrastructure / Supported records & verification

INSPECT: Hybrid Explorer

COORDINATE: Hybrid Federation

dectec is an AiFi company. Twin Vault and agentic commerce connect business knowledge with approved AI experiences.

04 / DECTEC + TWIN VAULT

# The knowledge behind useful intelligence

Give approved people and applications relevant organizational context.

CONTEXT

## A controlled knowledge foundation

Choose the information, define who may use it and agree the application and operating scope.

APPLICATIONS

## AI twins, events and employment

The executive strategy extends the knowledge direction into Twin experiences. Rollout and commercial scope are confirmed for each program.

05 / FINANCIAL CONNECTIONS

# A workflow that keeps the purpose in view.

A financial instruction needs a provider, explicit approval and a confirmation that can be reconciled.

01

## Prepare

Capture the purpose, beneficiary and supporting record.

02

## Authorize

The designated person or institution reviews the exact instruction.

03

## Connect

Use the agreed provider, market and financial route.

04

## Reconcile

Match the confirmation to the underlying business record.

USD1 is the priority settlement direction in AiFi’s World Liberty strategy. Individual financial routes, European market connections and card programs require provider agreements, supported jurisdictions and service authorization.

06 / ENGAGEMENT

# Define the outcome. Agree the operating scope.

01

## Choose the first use case

Name the customer, users, information, market and intended result.

02

## Map the responsibilities

Agree identity, data access, providers, budget, authority and record ownership.

03

## Validate the handoffs

Set acceptance criteria for application behavior, approvals, exceptions and evidence.

04

## Expand with purpose

Add services and applications as the relevant connections and operating requirements are established.

07 / THE COMPANY

# Leadership. Architecture. A practical next step.

01

## Tony Isaac

President & Chief Executive Officer

02

## Bill Inman

Chief Innovation Officer / CEO of dectec

03

## Sean Prescott

Chief Architect

Bring a specific business objective. We will help define the products, participants and implementation scope it needs.
